## INTERMODAL & RAIL CAR SOLUTIONS

Now, more than ever, shippers seek innovative ways to transport goods more cost effectively. Increasing fuel costs and customer demand have resulted in drastic improvements in intermodal transportation. No longer is there a significant sacrifice of speed for cost savings. R&R has developed direct rail contracts and relationships with Union Pacific, CSX, Kansas City Southern, Norfolk Southern, and Canadian National Railway that allows us to offer service directly with these operators. Combining these capabilities with our network of assets allows us to meet even the most demanding transportation expectations. Our broad portfolio of intermodal solutions provides industry-leading on-time service for customers of all sizes and industries.

## HEAVY HAUL & OVER DIMENSIONAL

Over-weight transport, commonly referred to as heavy haul or over-dimensional, requires careful planning to ensure safe, on-time delivery. R&R's heavy haul services have provided our clients with the best in heavy haul and over-dimensional solutions. This specialized service demands close attention to a variety of load-specific details, particularly in route planning, safety requirements, load permits, and specialty equipment. R&R logistics professionals understand what it takes to execute these complex shipments

## **PROJECT PLANNING & LOGISTICS**

Project planning and logistics requires close attention to detail and a thorough understanding of project-specific requirements and expectations. Our team understands the nuances of project planning; this is what we do every day. Over the years, we've cultivated close relationships with permit offices, local utility companies, crate and equipment providers and partner-carriers throughout North America which enables us to safely and efficiently drive customer projects to completion. We offer only practical solutions with a clear plan at highly competitive rates.

## **MANAGED TRANSPORTATION**

R&R logistics professionals take the time required to understand our customers' entire supply chain, including carrier sourcing and management, shipment planning and scheduling, the dispatch process, tracking and tracing, current technology, payables and reporting metrics used to manage the decision making process. We deliver cost savings and efficiency improvements to your organization. We utilize the knowledge gained from over 30 years of market experience and a combined organizational spend of over \$300 million to get the most value for your dollar. Our solutions focus on:

1. Design - How should the optimized supply chain network look?
2. Source - What partners are needed to meet the design?
3. Execute - Delivery of the agreed upon solution to drive quality and value across the supply chain
4. Improve - Use relevant data to measure results and provide client-specific metrics.

## **INTERNATIONAL OCEAN**

Sometimes the best route for your freight is by sea. Look to our international division to provide global ocean freight services at all major ports. We have access to a broad network of fully qualified ocean freight forwarders and licensed non-vessel operating companies (NVOCC's). Our services include container, less than container, and over dimensional break-bulk cargo.

## **BROKERAGE SOLUTIONS**

Generally speaking, most shippers use an intermediary to some extent. The prevailing view of shippers regarding the broker and 3PL relationships is straightforward, and so is our approach to freight brokerage and a solution. The process is simple:

1. Get to know the customer's business and their needs.
2. Solve a problem, do not sell price
3. Follow through on promises and hold our partners to those expectations.

It is still true that eighty percent of carriers have 5 or fewer trucks; we utilize our proprietary technology to access the small carrier community more quickly and with greater success than a shipper can on its own. We work tirelessly to build the relationships held within the carrier community and we are experts at deploying these assets on behalf of our customers.
